Today saké is a Japanese traditional handcraft, a product that is highly respected to brew.

But let's go back to where it started, around 2000 years ago.

A mother is cooking her baby rice for dinner, an everyday routine.

Before feeding her baby she puts the rice in her own mouth, chews it to make it both colder and easier for the baby to eat. When the baby is full and happy she saves the rice she already chewed for the next day.

What she didn't know was that she actually started the process of making saké.

By introducing the rice to the enzymes in her saliva she started the process of fermentation.

The world of sake is expanding and it's a great beverage to combine with food.

Also, if you choose a saké of high quality you might be able to leave without a hangover.

Coravin

Vi är väldigt selektiva när vi plockar ut våra viner, och försöker jobba med viner som ska passa in hos oss, harmonisera med maten och framförallt ge er en upplevelse

Vi vill gärna kunna ge er en annorlunda erfarenhet genom att erbjuda våra mer exklusiva viner på glas. Fråga vår hovmästare eller serveringspersonal vilka viner vi erbjuder för kvällen.

Om det skulle vara någon flaska ni är sugna på att prova av, kan vi nog se till att öppna den också.

Palle rekommenderar Clio så länge lagret räcker
